

Thank you for your interest in
Childrens Hospital Los Angeles and the

Mark Taper- Johnny Mercer Artists Program

Childrens Hospital Los Angeles is one of the few hospitals nationwide to provide a multidisciplinary program of visual arts, music, poetry, and other creative and expressive therapies in the course of family-centered care.

We rely on the generosity of donors and volunteers to provide these services, and are always in need of monetary donations and supplies. Please ensure that supplies are new (in original packaging) to help us avoid introducing infection into the hospital environment.
